

RESI-DALI-PS

Power supply for DALI light bus

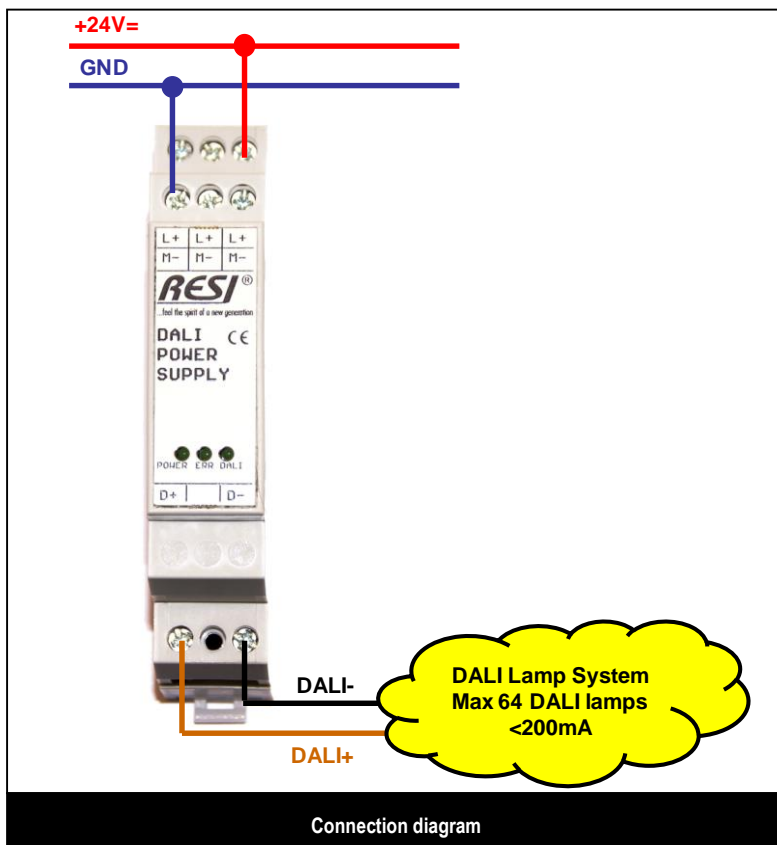

Digital
Addressable
Lighting
Interface

This 24V= to DALI power supply offers true 200mA for up to 64 DALI loads on one DALI bus. Therefore its an ideal solution for applications, where you want to supply the DALI bus power directly for the internal 24Vdc power supply of your switchboard cabinet.

RESI-DALI-PS

Power supply for 24Vdc input voltage and DALI bus voltage with up to 200mA current on DALI bus for 64 DALI loads, dimension (LxWxD): 17,5x58x90mm, power supply: 24V=, power consumption: <6W, mountable onto a EN50022 DIN rail, weight: 65g

AT A GLANCE

- DALI power supply for a DALI lamp system with up to 64 DALI ballasts
- Maximum of 200mA load on the DALI bus
- Primary power supply: 24V=
- Primary power consumption: <6W
- DALI power supply and 24Vdc power supply are galvanically insulated
- Mountable onto a EN50022 DIN rail
